

## Plant Sales

### Arrangement of flowers for congratulation and condolence occasions

We can arrange phalaenopsis orchids and flower arrangements according to your budget. Recently, more and more people are giving houseplants as gifts because they are easy to care for and can grow permanently.

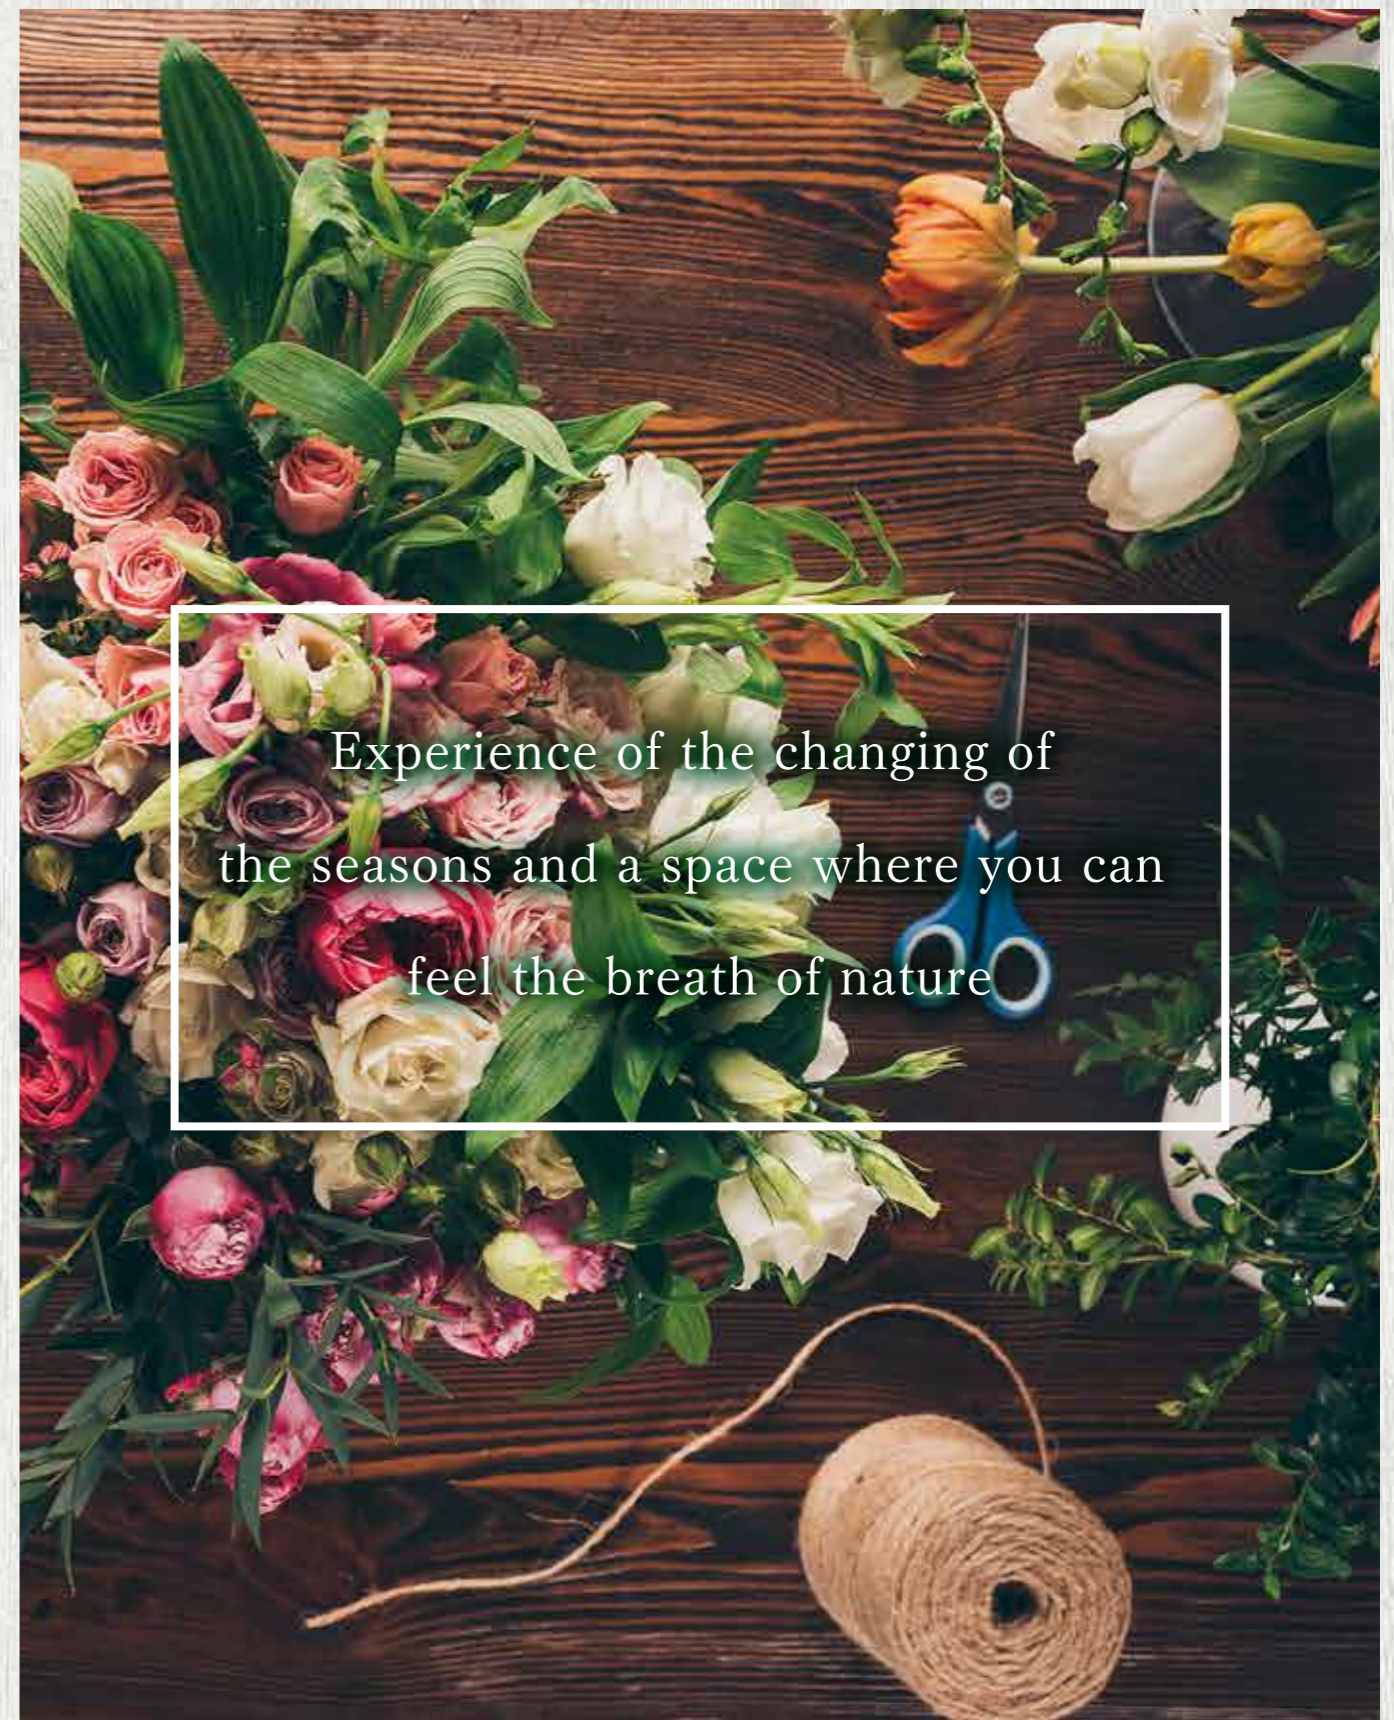

Nationwide shipping is available. We can also handle events and novelty items.

Installation example

### Flower stands

If you order the arrangements in batches, we can give them a sense of unity and neatness when displayed.

Experience of the changing of the seasons and a space where you can feel the breath of nature

## Examples of our achievements in giving shape to customers' ideals

We will create a planting plan from an annual program to a spot one. After confirming the image sketch, we will start construction. Please let us handle all your planting and management needs, from the proposal (estimate) to construction to management.

## Green Space Management

We offer a wide range of services, from annual management to one-time arrangements for events, both indoors and outdoors. Please consult with us for corporate and individual services.

### Features of green space management

We try to create a comfortable space with a sense of unity by proposing plantings that match the surrounding atmosphere and buildings.

We maintain the space, providing evergreen symbol trees to create an atmosphere and planting seasonal flowers to let people feel the changing seasons. We also create seasonal displays for Christmas and New Year's.

We use various materials to match the plants and create a scene that integrates with the surrounding scenery.
